11	<p>Field Code: 62</p> <p>Field Name: Date of Loan Status</p> <p>Error Code: 580</p> <p>Error Message: Date of Loan Status must be equal to or less than submittal date</p>	<p>50% of the current errors are at one GA, however this is an error that is across multiple GAs. GAs expressed concern that the edit did not allow a future loan status for future enrolment start date. NSLDS edit allows for this condition only if the status is ID. ID loans may have a future loan status date. GAs also pointed out that it is common for DA loans to have an upcoming enrollment reported as a future loan status. NSLDS researched the common conditions for this error and established that there are two primary reasons for this error:</p> <ol style="list-style-type: none"> <li>1. <b>Claim Payment Date</b>—Many GAs must schedule claim payment dates in advance of the actual dates in order to fund claim payments. This creates a future date on their system.</li> <li>2. <b>Date of Deferment</b>—It is common for a deferment to be granted based on a new loan with an enrollment date in the future. This will give a date in the future.</li> </ol> <p>The NCHELP workgroup suggested that NSLDS modify the edit to permit future dates based on these common industry practices (number of days into the future to be determined). At August 2000 NCHELP meeting, while there was no consensus as each does something different, there appeared to be acceptance of using 45 days for Claim Payment Date and 6 months (equal to grace period) for Date of Deferment. Final decision to be made during Preliminary Design Review.</p>	<p>By end of February 2001</p>
