Overview of PESC

⇒ Mission

Established in 1997 and located in Washington, D.C., PESC is a non-profit association of colleges and universities; professional and commercial organizations; data, software and service providers; and state and federal government agencies.

PESC's mission is to guide the higher education community in leveraging the value of electronic standards for data exchange with the overall goal of improving service, controlling costs, and attaining interoperability.

PESC supports and promotes the use and adoption of existing electronic standards set through official standards-setting bodies, as well as open industry collaborations, and sets new industry standards where there are no national or international bodies to do so.
