## Do You Want 128-bit Encryption?

You may be using a browser that does not support 128-bit encryption. When configuring your browser, you may choose to use 40-bit, 56-bit, or 128-bit encryption to protect your information. If you choose to use 40-bit or 56-bit, your account information will still be secure, but if you want the strongest encryption available on the Internet, you will need a browser that is capable of encryption at 128 bits such as the **U.S./Canadian version** of Netscape Navigator 3.x, 4.x, or Microsoft Internet Explorer 4.x. You can download one of these browsers by going to one of the links below. If you have difficulties or questions, please consult our [Browser Information](#) page.
