Notice to student about making corrections

Student's ID (SSN, first 2 letters of last name, and transaction number) appears again at bottom of page on both SAR and SAR Acknowledgement

300-03-3502 ST 01

The EFC printed on the front page of the SAR is either the primary or secondary EFC, calculated for a nine-month academic year (see page 18 for information on the primary and secondary EFC). An asterisk printed next to the EFC indicates that the student was selected for verification by the CPS. A “C” printed next to the EFC means the student has an eligibility problem identified by the data matches that must be resolved before Title IV aid can be disbursed to the student.

One of two messages might appear below the EFC—BA DEG REC'D means the student reported in question 33 on the application, or in a correction transaction, that he or she will have received a bachelor's degree by 7/1/99. GRAD/PROF appears when the student answered “Yes” to question 54, that he or she will be working on a degree beyond a Bachelor's degree during 1999-2000. In addition to these messages, SAR/ISIR comment text will also inform the student and FAA when a student reports that he or she will have a BA or be enrolled in a graduate or professional program. A student who answers “Yes” to either question is not eligible for a Pell Grant. Such student records are not sent to the Pell Payment System, and if a school attempts to report a Pell Grant payment, the payment system will not recognize the student and will reject the payment record even if the EFC is in the Pell eligible range.

Important reminder: Even though all income and asset information is correct and the EFC is less than the maximum Pell EFC, if a student incorrectly indicates that he or she has a BA degree or is a graduate/professional student, these items must be corrected on the SAR or through EDE, and processed through the CPS. Only then will the payment system be able to identify the student as eligible to receive a Pell Grant.

The FAA Information sections on the SAR, SAR Information Acknowledgement, and ISIR will print a “Y” for the Pell Eligibility Flag to identify students who *are* eligible for Federal Pell Grants based upon their EFCs and class levels. The Pell Eligibility Flag will be blank for students not eligible for Pell.

Comments. On both the SAR and the SAR Information Acknowledgement, the initial comments inform the student about eligibility for federal student aid and give basic instructions on reviewing the application information and making corrections if necessary. Other comments relate to specific problem areas, such as missing information or eligibility problems. On the SAR, comment text is continued on a subsequent page if necessary. The SAR will carry up to 20 comments, and an application that generates more than 20 comments will be rejected (Reject 20).

The SAR Information Acknowledgement comments are fewer and less detailed, and generally refer the student to the FAA for assistance in making corrections or resolving problem issues. A SAR Information Acknowledgement is sent to the student only when application or correction data are entered electronically by a school through EDE. In these cases, the student and the school are already in contact and generally the student will enroll in the school that transmitted the data.

To assist in situations where a student might take the SAR Information Acknowledgement to a new school, we print the DRN and the full set of SAR/ISIR comment codes in the Processing Results section on the document (see Appendix D for comment codes and text).

On the SAR, two strings of numbers appear at the bottom of every page. The left-hand numbers are processing codes used by the FAFSA Processors and the CPS for tracking and quality control purposes. The

RE1100456 12345678901

321-54-0987 ST 01

right-hand numbers are the student identifiers: the original SSN and first two letters of the student's original last name, and the transaction number.

On the SAR Information Acknowledgement, the top of page one shows the student identifiers, transaction number and DRN in a similar position as these appear on the two-part SAR. Only the student ID is repeated at the bottom of the SAR Information Acknowledgement page.

NOTE: If a student changes his or her social security number, or changes his or her name in the CPS, the original social security number and first two letters of the original last name will continue to be used as the student ID. The SAR fields that show the last name and the SSN—fields 1 and 8—will carry the corrected name and SSN. However, when used as an identifier—on correspondence or in requesting duplicates—the student should use the original SSN and name.

If the student applies in the following award year using the correct name and SSN, the records for that year will carry the correct identifiers.

Correction Applications are not needed except to correct a situation when two students are using the same social security number. Correction Applications are obtained by calling the Correction Applications Coordinator for ED at (202) 260-9988.

Page One—Back

The back of page one displays in condensed form every numbered question from the FAFSA and prints the answer the student gave to that question or the value the CPS assumed.

Exception: If the student’s application is rejected and an EFC is not calculated, the back of page one will not have an information summary, but will contain the FAA Information section instead.

Back of Page One, SAR and SAR Information Acknowledgement

SAR

This section contains information from your student aid application (shaded items display parents' information, if provided). Use the Information Review Form (Part 2 of your SAR) to correct this information. Do not make corrections on this page.

SAR Information Acknowledgement

This section contains information from your student aid application (shaded items display parents' information, if provided). If you need to make corrections, see your financial aid administrator.

Information Summaries on ISIRs

The student's processed application information appears on the printout of an electronic ISIR in a two-column, two-page format with an abbreviated version of each FAFSA question on the left and the student's response on the right. Information is divided into sections like the FAFSA sections, e.g., Step One: You (The Student). Questions are not numbered individually, but each section heading identifies the range of FAFSA questions included.

FAFSA section	FAFSA question numbers
Student ID	321-54-0987 ST 01
STEP ONE: YOU (THE STUDENT) (Q1-Q52)	
Name:	MARY B. STUDENT
Address:	235 MAIN STREET CENTERVILLE, KS 98765
Social Security Number	321-54-0987
Date of Birth	NOVEMBER 21, 1974

FAA INFORMATION

The FAA Information section displays every relevant piece of information about a student's eligibility in one place, whether on a SAR or ISIR. The format and content vary somewhat between the SAR and ISIR, but all codes and flags have the same meaning wherever they appear.

The FAA Information box on the SAR appears at the end of Part 1, following the last comment to the student. On the SAR Information Acknowledgement, a section headed "Processing Results" on the back of page one contains information and codes for FAAs. On the ISIR, FAA information is printed on the second page following the summary of application data. Descriptive labels are intended to help the FAA identify reject codes, match flags, intermediate values, and so forth.

Using the SAR information section as a basis, here are identifications for the codes and flags that appear as FAA Information, reading from top to bottom for each column. Primary and secondary EFCs and Intermediate Values will be discussed later.

COMMENTS:

COLUMN ONE

Agency Source

The agency source code identifies a FAFSA processor or other source of the application.

1	Electronic Application (EDE)
2	Electronic Renewal Application (EDE)
4	FAFSA Express
5	ACT (American College Testing)
6	FAFSA/Renewal FAFSA Web
7	NCS (National Computer Systems)

Record Source Type

This identifies the type of input that produced a transaction.

Blank	Original application (paper / electronic)
R	Renewal application (any source)
C	Correction Application
H	History Correction (paper / electronic)
D	Duplicate request
S	FAFSA Express/Web

Record Type

This code distinguishes an application from a correction that was made to a prior or existing transaction.

Blank	Original application (from any source)
C	Correction Application
H	History Correction

Verification Transaction Flag

The Verification Transaction Flag will indicate if a student has met a verification selection criteria on this transaction. The codes of A-C or 1-37 represent the specific selection criteria and are used primarily by ED for statistical and analytic purposes. The verification transaction flag will be blank if no criteria are met.

Verification Tracking Flag

The Verification Tracking Flag is set when the student is selected for verification on any transaction. When it is used, it will be set with a code of A through C or 1 through 37, and is used solely to identify the reason why the student was selected for verification on either the previous or subsequent transaction. An FAA only needs to know whether or not a student's information must be verified. The required documentation and procedures for the school are the same regardless of the reason the applicant was selected for verification.

Example: If an applicant is selected for verification on the 01 transaction, "verification transaction flag" and "verification tracking flag" will both carry a code of A through C or 1 through 37. If the applicant then makes a correction and no longer meets the verification selection criteria, the 02 transaction will show a blank in "verification transaction flag" but the "verification tracking flag" will continue to show the selection criteria from the 01 transaction.

The verification tracking flag will be blank if the record was not selected for verification.

COLUMN TWO

Model (Dependency Status)

D	Dependent
I	Independent
X	Rejected dependent
Y	Rejected independent

Duplicate Copy

Blank	Not a duplicate SAR
D	The SAR was requested as a duplicate copy

SysGen

These codes identify a system-generated transaction that was initiated by the CPS, rather than resulting from an application or correction sent to the CPS. The codes show why a record was automatically generated by the CPS:

Blank	Not system-generated
A	Applicant released from drug abuse hold file
D	Duplicate request, and hold status has changed
H	Applicant released from verification hold
L	Duplicate request and NSLDS match data have changed
N	NSLDS postscreening transaction
Z	Reprocessed transaction

ISIRs for system generated transactions will be sent to schools in a separate electronic message class.

Dependency Override

This flag identifies a record that resulted from an application or correction on which a successful dependency override request was made by an FAA. Initial applications allow overrides to be made in one direction only: from dependent to independent. The SAR and EDEExpress allow an FAA to cancel a previous override. Comment 46 will notify the FAA when an attempt to perform or cancel a dependency override was not successful.

Blank	No dependency override
Y	FAA override from dependent to independent (Comment 164)
N	Dependency override cancelled (Comment 165)

When an FAA performs a dependency override, only the school that submitted the override will receive the new ISIR transaction.

Special Handling

In certain unusual circumstances, the Department, a Multiple Data Entry contractor, or the Federal Student Aid Information Center may need to special handle (e.g., hand-stamp, overnight mail) a student's SAR. These codes identify the reason for special handling or who requested the special handling.

Blank	No special handling
*	MDE requested special handling
@	ED requested special handling
P	address too long; requires special handling
L	Late processing authorized by ED

Reprocessing Code

This code provides information about batches of records that are reprocessed by the CPS for any reason. When the SysGen flag is set to "Z," this position will contain a two-digit number, beginning with "01" and incrementing each time that a group of records is reprocessed. Check the Information for Financial Aid Professionals web site (<http://ifap.ed.gov>) for announcements that will define the reason associated with a particular code.

COLUMN THREE**FAA Adjustment Flag**

This flag indicates that a transaction resulted from a professional judgment adjustment by an FAA. Comment 27 also notifies an FAA that an adjustment was successfully performed.

Blank	No adjustment processed
Y	FAA adjustment processed

When an FAA uses professional judgment to change a data item on a SAR or ISIR, only the school that made the change will receive the new ISIR transaction.

Reject Reasons

Up to seven reject reason codes can be printed in this position. Refer to Appendix A for the reject reason codes and the comment numbers associated with certain types of rejects.

Application Receipt Date

This date shows the date the paper application was received by the FAFSA processor, or the date an electronic FAFSA transmission was received by the school or entered by the applicant. In the paper system, the maximum time allowed by contract with the processors to enter and transmit the application data (turnaround time) is 7 days for original applications and Renewal applications, and 5 days for corrections. The maximum CPS processing turnaround time is 3 days.

These days are defined by the contracts as “work” days (Monday through Friday), not calendar days. The maximum time allowed from receipt of an application or correction to mail-out of the SAR would be 14 work days for original applications and Renewal applications, and 12 work days for corrections. These totals for maximum turnaround time do not include mailing time for the application or correction to reach the FAFSA Processor or for the SAR to reach the student.

Transaction Receipt Date

The date appearing in this position is the date that a processor or the CPS received the input information that generated the transaction. As described above, the receipt date for the first application will be a fixed date; the transaction receipt date, however, will change each time a new transaction is generated. For example, a student sends in a Renewal Application that is received by the FAFSA processor on March 13, 1999. This first transaction SAR and ISIR would have an Application Receipt Date and a Transaction Receipt Date of March 13, 1999. The student then sends in a subsequent original FAFSA on March 23, which produces an 02 transaction. The 02 SAR and

ISIR would keep the Application Receipt Date of March 13, 1999 but the Transaction Receipt Date would be March 23, 1999. If the student then mails in a SAR with corrections and it is received on April 17, the 03 transaction would show an Application Receipt Date of March 13, 1999 and a Transaction Receipt Date of April 17, 1999.

Subsequent Application Flag

This flag indicates a transaction that resulted when a second, or subsequent, application was processed. Except for address and school choices, the data on the SAR or ISIR generated by a subsequent application will be the same data the student submitted on the first application. If a different address and different school choices are provided, the new information will appear in these fields on the new transaction.

Blank	Not a subsequent application
Y	Second or later application

Early Analysis Flag

Using FAFSA Express or FAFSA on the Web, a student may indicate that he or she is applying for early admission for the 2000-2001 school year. The software sets a flag on the student's record that appears in the FAA Information area. The early analysis indicator will appear on the SAR and the ISIR, but not on the SAR Information Acknowledgement. Please note that the early analysis flag does not invalidate the SAR—it simply notifies the school that a student checked the early analysis box on a FAFSA Express or FAFSA on the Web application. If the student actually enrolls for the 1999-2000 school year, the early analysis record may be used for that school year. The early analysis flag may be corrected to blank using EDEExpress.

Blank	Not an early analysis student
Y	Student indicated early analysis on FAFSA Express or FAFSA on the Web

Auto Zero EFC Flag

An applicant who meets certain tax filing and income criteria will qualify automatically for an expected family contribution figure of “0.” When these criteria are met, the CPS assigns a “0” EFC and does not perform a calculation except for TI, STI, and FTI. Only these three intermediate values will appear in the FAA Information section.

Blank	Does not meet criteria
Y	Student meets automatic zero EFC criteria

SNT Flag

This flag gives information about the Simplified Needs Test calculation that excludes asset information. It is performed if an applicant meets certain criteria for tax filing status and income level.

Y	SNT was met
N	SNT was not met or could not be determined

Pell Eligible Flag

This flag alerts schools to an applicant's Pell Grant eligibility status. A "Y" in this location confirms that a student's EFC and undergraduate status makes him or her eligible for a Pell Grant, and that the record has been included in the payment system database.

Blank	Not eligible for a Pell Grant
Y	Eligible for a Pell Grant

If a student who is an undergraduate incorrectly reported on the FAFSA that he or she will be a graduate student or has a bachelor's degree, this information **must** be corrected. Otherwise, he or she will be considered ineligible for Pell and the school will be unable to receive Pell funds for that student.

Match Flags

These alpha or numeric codes show the results of matching the applicant record with a data base containing information that can affect eligibility. A

detailed discussion about the flags or codes that will appear in the FAA Information section for the SSN Match Flag, Selective Service Registration Flag, Selective Service Match Flag, INS Match Flag, SSA Citizenship Code, VA Match Flag, NSLDS Match Flag, and NSLDS Results Flag can be found in Appendix B. Additional information on the NSLDS match can be found in Appendix C.

The INS Verification Number also appears under the “Match Flags” heading of FAA Information. The number that will appear in this position is a 15-digit confirmation number that the INS returns when a match was conducted. The FAA must use this number when secondary confirmation is necessary. See Appendix B for more information on how to perform secondary confirmation.

NSLDS Transaction Number

This code appears at the end of the match flag section, although it is not a true match flag. We provide the number of the last transaction on which the student's NSLDS data changed as a signal to the financial aid administrator to review NSLDS information on a particular transaction. See the Introduction and Appendix C for additional information on the NSLDS transaction number.

ISIR FAA Information

FAA Information on the ISIR is formatted a bit differently from the SAR. In the section titled Office Information, the following information appears:

OFFICE INFORMATION
DRN
Formula Type
Processed Date
Application Source
Transaction Type
Institution Number
Reject Override Codes
Assumption Override Codes

The student's DRN will appear in this section only for a transaction type of "0" or "5," when the school receiving the ISIR also entered the student's application or renewal application data. The DRN will not appear on an ISIR in other situations.

The Formula Type is not printed on the SAR but does appear on the SAR Information Acknowledgement since the SAR Information Acknowledgement is the paper output from an electronic transaction. Other codes in this section correspond to SAR data, e.g., application source corresponds to "Agency Source" on the SAR.

The "Formula Type" code tells an FAA which formula was used to calculate the EFC.

- 1 Full needs test: dependent
- 2 Full needs test: independent w/o dependents
- 3 Full needs test: independent with dependents
- 4 Simplified Needs Test: dependent
- 5 Simplified Needs Test: independent w/o dependents
- 6 Simplified Needs Test: independent with dependents

"Transaction Type" identifies the source of the transaction.

- 0 Electronic original application
- 1 Paper application
- 2 Electronic correction
- 3 Electronic duplicate request
- 4 Paper correction
- 5 Electronic renewal application

The Institution Number verifies the identity of the originating institution. Reject and Assumption Override Codes appear because the EDEXpress software allows an FAA to override certain rejects that are designated as "verifiable" rejects. It also allows an FAA to override certain assumptions that the CPS would make about a student's data when the information appears to be inconsistent. The Office Information section on the ISIR shows which Reject Override Codes and which Assumption Override Codes were set on the transaction.

The ISIR also has FAA Information at the end of the information summary. The codes appearing on the ISIR are identical to codes that appear in the SAR FAA Information section except for "Correction # Applied To," which reports the transaction number against which an electronic correction was applied.

ISIR FAA Information

	NSLDS Transaction Number				NSLDS Results Flag	
Comments:						

**SAR Information Acknowledgement
FAA Information**

Because this type of SAR is a paper report to the student, but also an eligibility document like the correctable SAR and the ISIR, it contains information for both student and FAA. The intent of this document is to allow a student to review processing results when the information was input electronically by the school. The information section is headed "Processing Results" rather than "FAA Information."

We have included here all the important match flags showing results of eligibility matches, as well as other information that an FAA would need when using the SAR Information Acknowledgement as an eligibility document.

The comment text printed on the front page is a basic set of comments directed to the student, but the comment codes listed at the bottom of the section include all SAR/ISIR comments that were generated for this record.

Primary and Secondary EFCs/Alternate EFCs

Both SAR and ISIR FAA Information sections contain the headings "Months," "Primary EFC," and "Secondary EFC."

If both a Primary and a Secondary EFC appear, it means the student qualified for the Simplified Needs Test (SNT) but also provided information about assets. Two calculations were performed, producing the Primary EFC (asset information was not included in the calculation) and the Secondary EFC (asset information was included in a full-data calculation). If only a Primary EFC appears, it means either 1) the student did not meet the Simplified Needs Test criteria and only the full-data calculation was done, or 2) the student met the SNT criteria but provided no asset information, or provided incomplete or inconsistent asset information and only one calculation could be performed.

The figures printed for each of the twelve months represent alternate EFCs that an FAA must use to award aid—other than Federal Pell Grants—for an academic year that is less than or greater than nine months. For a dependent student, the alternate EFCs are calculated by the CPS according to a formula prescribed in the Higher Education Act of 1965, as amended. For the independent student, the law does not provide a formula but the CPS calculates a simple proration of the EFC by month.

Intermediate Compute Values

These abbreviations represent the intermediate steps used in calculating the EFC. They show the separate components of the need analysis formula, such as the “employment expense allowance” or “parents’ contribution from assets.” These components are defined in the Higher Education Act of 1965, as amended. The values can be useful to FAAs in doing recalculations or in making professional judgment adjustments to data.

Detailed information on the need analysis formula and methodology for calculating the EFC is available in the 1999-2000 *SFA Handbook: Student Eligibility*.

Alternate EFCs and intermediate values do not appear on the SAR Information Acknowledgement, only on the two-part SAR and the ISIR. The intermediate values are identified as follows:

TI	Total Income
ATI	Allowances Against Total Income
STX	State and Other Tax Allowance
EA	Employment Allowance
STI	Student’s Total Income
IPA	Income Protection Allowance
AI	Available Income
CAI	Contribution from Available Income (Independent Student)
DNW	Discretionary Net Worth
FTI	FISAP Total Income
APA	Education Savings and Asset Protection Allowance
PCA	Parents’ Contribution from Assets
AAI	Adjusted Available Income
TPC	Total Parents’ Contribution
TSC	Total Student’s Contribution
PC	Parents’ Contribution
SIC	Dependent Student’s Income Contribution
SCA	Dependent Student's Contribution from Assets

Comment Codes

The last line in the FAA Information sections shows the codes for comments generated on the record which are important to the FAA. Standard comments to the student are not included here. FAAs can review the comment codes and not have to read through every comment provided on the SAR to find information requiring FAA action. Up to 20 comment codes may be printed, and students receiving more than 20 comments will be rejected (Reject 20).

The EDEExpress software allows comment text to be printed out, if desired, for an ISIR. The SAR Information Acknowledgement, as mentioned previously, prints the full set of SAR comment *codes* pertaining to that student's electronic record in the "comment code" section under Processing Results. The comment text printed on the page, however, will be taken from the set of eight basic comments written for the student's information. All comment codes and text used in 1999-2000 are provided in Appendix D. The SAR Information Acknowledgement comments appear on the first page of Appendix D.
